JOURNAL OF SMART BIOPROSPECTING AND TECHNOLOGY

Research Center of
Smart Molecule and Natural Genetics Resources
Universitas Brawijaya
JSMARTech : Journal of Smart Bioprospecting and Technology

JSMARTech : Journal of Smart Bioprospecting and Technology (p-ISSN 2686-0808; e-ISSN 2714-7894) is an Open Access Scientific Journal published by Research Center for Smart Molecule and Natural Genetics Resources, Universitas Brawijaya, Malang, East Java, Indonesia since 2019. It covers all aspects of bioprospecting and technology, including biochemical, genetics, biotechnology, bioinformatics, natural product, metabolism, biopharmaceuticals, biodiversity, systematics, biomedical, molecular biology, molecular genetics, nutrigenomic, herbal medicine, DNA barcoding, nanotechnology, agriculture, and bioremediation. The journal publishes a manuscript written in English for original research papers, short communications, and review articles. JSMARTech publishes two issues each year.

EDITORIAL TEAM

Editor in Chief
Prof. Dra. Fatchiyah, M.Kes.,Ph.D
Biology Department, Faculty of Mathematics and Natural Sciences, Universitas Brawijaya, Indonesia

Managing Editor
Anna Safitri, M.Sc., Ph.D
Chemistry Department, Faculty of Mathematics and Natural Sciences, Universitas Brawijaya, Indonesia

Eko Suyanto, S.Si., M.Sc.
Biology Department, Faculty of Mathematics and Natural Sciences, Universitas Brawijaya, Indonesia

Dewi Ratih Tirto Sari, S.Si., M.Si
Biology Department, Faculty of Mathematics and Natural Sciences, Universitas Brawijaya, Indonesia

Editorial Board
Prof. James R.Ketudat Cairns,
School of Chemistry, Institute of Science, Surananee University of Technology, Thailand

Prof. Takeshi Ohta
Faculty of Agriculture, Kyoto University, Japan

Prof. Mikio Nishizawa, M.D.,Ph.D
Department of Biomedical Sciences, College of Life Sciences, Ritsumeikan University, Japan

Associate Professor Roswanira Abdul Wahab, Ph.D
Chemistry Department, Faculty of Science, Universiti Teknologi Malaysia, Malaysia

Sakesit Chumnarnsilpa, Ph.D
School of Chemistry, Institute of Science, Surananee University of Technology, Thailand

Chandra Kirana, M.Sc.,Ph.D
Faculty of Health and Medical Sciences, The University of Adelaide, Australia

Tomohiko Sasase, Ph.D
Central Pharmaceutical Research Institute, Japan Tobacco, Inc., Japan
TABLE OF CONTENTS

Cover page ..........................................................................................................................................................i

Editorial Team ..................................................................................................................................................ii

Table of Contents ..........................................................................................................................................iii

Spirulina platensis’s phycocyanobilin as an antiangiogenesis by inhibiting VEGFR2-VEGFA pathway in breast cancer: in silico study ..................................................................................................................87

In-Silico Analysis of Procyanidin Type-A Extracted From Cinnamon for Diabetes Mellitus Type 2 Treatment ........................................................................................................................................92

Virtual Screening of Mimosa pudica Secondary Metabolites as Hyaluronidase B Potential Inhibitor to Prevent Vespa velutina Venom Spreading .................................................................................................96

Anti-Obesity Properties of Black Pepper (Piper nigrum): Completing Puzzle using Computational Analysis .............................................................................................................................................101

In Silico Study of Vacuolin-1 as an Inhibitor of HSP27 for Precancerous Treatment of Breast Cancer ......................................................................................................................................................107

In-Silico Screening Compounds of Brassica rapa ssp. chinensis as Potential Inhibitor of Neutral Amino Acid Transporter B0AT1 as an Alternative Phenylketonuria Treatment ........................................................................113
